

# DECISION SUPPORT TOOLS for NUTRIENT MANAGEMENT

for more details, visit [www.fairway-project.eu](http://www.fairway-project.eu)

FAIRWAY

Fertilisers and manures supply nutrients that are essential for crop growth. The amount of nutrients required depends on the crop type, soil type and weather conditions

Decision support tools help farmers and their advisers apply the right amount of nutrients at times when crops can use them most effectively.

Digestate and compost use in agriculture

February 2016

wrap

Accurately calculating crop nutrient requirements improves crop yields, reduces costs to the producer and minimises the risk of water pollution

This project has received funding from the European Union's Horizon 2020 research and innovation program under grant agreement No 727984
